EDUCATION

Stanford University	Stanford, CA
Ph.D., Chemical Engineering, GPA 3.95	Expected June 2025
M.S., Chemical Engineering	2020 – 2023
Princeton University	Princeton, NJ
B.S.E., Chemical and Biological Engineering, <i>cum laude</i>	2016 – 2020
Minor, Materials Science and Engineering	

EXPERIENCE

Stanford University , Stanford, CA	2021 – Present
<i>Doctoral Researcher</i> PI: Gerald G. Fuller	
- Developed and optimized a portable magnetic stress rheometer using CAD-designed components and Raspberry Pi, reducing device costs from ~\$90k to \$160 for use in medical settings. Applied hands-on engineering, testing, and troubleshooting to enhance real-time fluid flow predictions for abscess drainage. - Engineered 3D bioprinting systems for rheological analysis of bioinks, solving technical challenges related to crosslinking kinetics and optimizing mechanical properties for complex biological tissues. - Managed lab safety protocols and compliance as designated lab safety officer, attending quarterly environmental health and safety meetings to ensure regulatory adherence in research environments. - Instructed and mentored undergrad/grad students in <i>Mechanics of Soft Matter: Rheology (CHEMENG 470)</i>.	
Stanford University , Stanford, CA	2021
<i>Doctoral Researcher</i> PI: Joseph M. DeSimone	
- Developed and optimized high-resolution 3D Continuous Liquid Interface Production (CLIP) printing through experiments and simulations of optics and photopolymerization transport/kinetics. - Utilized CAD and 3D-slicing software to test and optimize 3D printer settings, enhancing resolution and precision in additive manufacturing processes.	
Princeton University , Princeton, NJ	2018 – 2020
<i>Undergraduate Researcher</i> PI: Sujit S. Datta	
- Investigated elastic turbulence in polymer flow using 3D-printed microfluidic model porous channels. - Featured in ACEE's first ever spotlight article on undergraduate contributions to environmental studies. - Thesis featured in profile article by the School of Engineering and Applied Science.	
TU-Dortmund, Fakultät Bio und Chemieingenieurwesen , Dortmund, Germany	
<i>Research Intern</i> Armin Quentmeier	June 2018 – August 2018
- Commandeered the Biochemical and Chemical Engineering department's contribution to the 2018 Engineering Meets Art exhibition, designed project involving photographs of microorganisms - Wrote 40-page manual with protocol for inoculation and dilution techniques, use of cameras, lenses, microscopes, and Adobe Photoshop Elements, and analyzed microscopic images using various software - Final projects displayed at exhibition in May – June 2019	
Princeton University , Princeton, NJ	2017 – 2018
<i>Undergraduate Researcher</i> PI: Celeste M. Nelson	
- Analyzed role of tissue mechanics in breast cancer tumor development using immunostaining - Synthesized and crosslinked polyacrylamide gels, passaged and stained cells, mass spectrometry, western blot, imaging and analysis	

SKILLS

Technical/Laboratory: CAD (Fusion 360, Onshape); 3D printing; laser cutting; hardware/embedded systems (PCB assembly, Raspberry Pi); SEM; PCR; cell culture; immunostaining; confocal microscopy imaging
Software: Java, MATLAB, Python; ImageJ; TRIOS; PIV; Adobe Illustrator, Photoshop; LaTeX; Microsoft Office

SELECTED AWARDS

2023	Chemical Engineering Department Service Leadership Award
2021	Judges' Vote and Audience Choice poster awards, Stanford MIPS Retreat, Stanford, CA
2020	National Science Foundation (NSF) Graduate Research Fellowship
2020	Lore von Jaskowsky Memorial Prize, Princeton School of Engineering and Applied Sciences
2020	Materials Science and Engineering Department Outstanding Senior Thesis Award
2020	Sigma Xi Scientific Research Honor Society Nominee
2019	PSEG Best Poster Award, ACEE Annual Meeting, Princeton, NJ

CONFERENCE TALKS

- **Shih, A.**, Chung, S. J., Shende, O. B., Brunel, L. G., Christakopoulos, F., Herwald, S. E., Vezeridis, A. M., Fuller, G. G., *Magnetic Stress Rheometer for Biological Fluid Characterization*. American Society of Chemical Engineers Annual Meeting (AIChE 2024), San Diego, CA, Oct. 2024.
- **Shih, A.**, Chung, S. J., Shende, O. B., Herwald, S. E., Vezeridis, A. M., Fuller, G. G., *Rheological Characterization of Biological Fluids*. NETZSCH Introduction to Rheology and Thermal Analysis Workshop, Palo Alto, CA, Oct. 2024.
- **Shih, A.**, Chung, S. J., Herwald, S. E., Vezeridis, A. M., Fuller, G. G., *Magnetic stress rheometer for biological fluid characterization*. American Society of Chemical Engineers Annual Meeting (AIChE 2023), Orlando, FL, Nov. 2023.
- **Shih, A.**, Chung, S. J., Herwald, S. E., Vezeridis, A. M., Fuller, G. G., *Magnetic stress rheometer for biological fluid characterization*. XIXth International Congress on Rheology (ICR2023), Athens, Greece, Aug. 2023.
- **Shih, A.**, Chung, S. J., Herwald, S. E., Vezeridis, A. M., Fuller, G. G., *Magnetic stress rheometer for abscess fluid characterization*. Society of Rheology Annual Meeting (SOR2022), Chicago, IL, Oct. 2022.

LEADERSHIP & MENTORSHIP

Stanford University , Stanford, CA	2022 – Present
<i>Research Mentor</i>	

- Mentored two undergraduate students and one high school intern, teaching them CAD, Python, MATLAB, ImageJ, fluid mechanics, and polymer theory.
- Provided hands-on guidance in hardware, coding, and data analysis, fostering technical skills and problem-solving abilities for real-world research projects in rheology, medicine, and 3D bioprinting.

Stanford University , Stanford, CA	2021 – Present
<i>Community Associate</i> Graduate Life Office	

- Coordinated 12 events annually to foster community among graduate student body, managing a \$3,600 budget for diverse and inclusive programs, including welcome, orientation, and multicultural initiatives.
- Advised graduate residents on support services and professional development, utilizing annual training on suicide prevention, servant leadership, bias intervention, and sexual harassment prevention.

Stanford University, Stanford, CA

2022 – 2023

Social Events Chair | Chemical Engineering Graduate Student Action Committee

- Served as liaison between ChemE student community and administration.
- Spearheaded multi-departmental events to expand the department's community, promoting social and collaborative connections across various department programs.

Stanford University, Stanford, CA

2022 – 2023

First-Year Mentor | Department of Chemical Engineering

- Guided first-year students in selecting labs, managing classes, and preparing for qualification exams, sharing resources and support through three meetings per quarter.

Stanford Splash, Stanford, CA

2023

Teacher Volunteer

- Taught hands-on workshop on polymer crosslinking to middle- and high-school students in two classes.

PROFESSIONAL AFFILIATIONS

Society of Rheology, American Institute of Chemical Engineers
